

INDEX—HOUSING

ADMINISTRATIVE SAFEGUARDS

in the field of elimination of sub-standard housing, 111 ff.; aspects of elimination problem, 111; prospective and retrospective regulation, 111; the nuisance doctrine background, 112; development of the hearing process in abatement of nuisance, 113; further contributions to growth of administrative fairness rules, 144 ff.; policy making and the administrative process, 116 ff.; democratic participation in rule making, 118; administrative problems of enforcement, 119; suggested guide posts for fair administrative action, 120 ff.; inspection, 121; hearing, 121; notice, 121; conduct of hearings, 122; utilization of records, 123; procedure with an eye on judicial challenge, 124; summary of administrative-legal methodologies, 124-125.

BUILDING CODES

background, 95; lack of uniformity, 96; developments toward uniformity since 1905, 97 ff.; present quickened rate of acceptance of new products, 99; shift toward performance rather than specific material prescription, 100; current aids in code drafting, 101; work of the American Standards Association, 101; techniques for keeping codes in touch with research results, 102; state-wide codes, 104; disagreement over degree of discretion to be vested in building officials, 105; need for appeals procedure, 106; particular application of codes to dwellings, 107; factors in adopting machinery to adopt new material on merit, 108; intensity of current interest and efforts in code improvement, 109.

CONTRACTOR LICENSING

as a legally sanctioned restrictive practice, 76 ff.; licensing used to limit number of competitors, 77 ff.; N. C. tile contractors as illustration, 77 ff.; licensing used to exclude unorthodox innovators, 78 ff.; striking down the self-employed small operator, 79; licensing as restriction on homeowners' own operations, 80; licensing to keep local market for selves, 81 ff.; licensing as limiting intensity of competition, 83; preventing unorthodox channels of distribution, 83; favoritism in licensing old-timers, 85; other personnel discriminations, 86; restrictive features with a licensing law: plan of business requirements, 86; bias of the examining boards, 87; fines and imprisonment as legal aids to the entrenched, 88; apprenticeship, 89; labor-industry united front, 90; tie-in with building codes, 91; doubts as to licensing as protection to the public, 91; the industry's poor comparative performance in costs, 93; summary of factors

making for a sick industry, 93-94; how licensing perpetuates these factors, 94.

CONSTRUCTION INDUSTRY (see also "HANDICRAFT AND HANDCUFFS")

COOPERATIVE HOUSING

legal aspects, in general, 126-142; nature of cooperativism, 126-127; forms of organization for cooperatives, 127 ff.; the trust form, 127; the corporate form, Limited Dividend Housing corporations, 129-131; special cooperative laws, 131; share subscriptions, 132; proxy voting, 132; expulsion of members, 132; democratic control, 133; transfer of membership, 133; dividends, 134; taxation of cooperatives, 135 ff.; financing, 137; veterans' loans, 138; title problems, 139 ff.; Wagner-Ellender-Taft Bill, 140-141; the speculative promoter of cooperatives, 141; summary, 142.

ECONOMIC ANALYSIS

of housing demands and supply, 186-205; cyclical nature of construction industry, 186 ff.; reasons for feasts and famines, 189-190; prospects for levelling cyclical variations, 192; wartime increase in housing facilities, 193; housing demands at various price levels, 194 ff.; basic problem of cutting costs, 195; building for low-income market, 195-196; basic data for industry's development of program, 196 ff.; probable demand 1945-1960 on various assumptions, 196 ff.; probable supply in same period, 197 ff.; effect of varying assumptions, 198 ff.; potential market for 15,000,000 units 1945-1960, 202; factors indicating possible cost reductions, 203; general observations, 204-205.

"HANDICRAFT AND HANDCUFFS"

excessive cost and the shortage, 47; difficulty of cost break-down, 47; labor unions' activity, 48 ff.; extent of unionization in building trades, 48-49; opposition to mechanization, 49; opposition to labor saving devices, 49-50; jurisdiction disputes, 50; unproductivity, not wages, keeps costs high, 51-52; racketeering, 51; industry's restrictive practices, 52 ff.; anarchy in sizes and design, 53 ff.; extent of atomization of the industry, 54; jurisdictional compartments comparable to labor's jurisdictional disputes, 55; "restraint of trade" practices, 56 ff.; impact of Sherman Act, 56 ff.; boycotts supporting channels of distribution, 58; price fixing—with subtle techniques, 59 ff.; quota devices, 61; patent licensing device, 62; an illustrative conspiracy against O.P.A., 62; industrial codes, 62; tie-in with racketeers, 63; reach of the Anti-Trust Law, 64 ff.; in particular, as to labor, 64-65; inadequacy of Anti-Trust as instrument of reform,

- 66; restrictive practices of the financial hierarchy, 67 ff.; degree of financial control, 68; an illustrative case in the N. Y. mortgage market, 68; finance's vested interest in slums, 69; and in maintenance of inflated realty values, 70; high interest rate maintenance, 71; skillful use of propaganda, 71; potential and probable reforms, 72 ff.; private economic measures, 73; technological improvement, 74.
- LABOR—UNECONOMIC PRACTICES** (see "HANDICRAFT AND HANDCUFFS")
- LAND LAW IN MASS HOUSING NEEDS**
 legal development through three stages of history, 30; *laissez-faire* era, 31 ff.; planning by private agreement—"covenants," 31; police power in the welfare state, 32 ff.; slums in light of common law deterrents to demolition, 32; nuisance doctrine, 33; zoning developments, 33; coming of building codes, 34; third stage, government working with private enterprise, 35 ff.; use of taxing power, 37; tax exemption device, 37; use of eminent domain power, 39 ff.; urban redevelopment corporation laws, 39; urban land clearance, 40; excess condemnation doctrine, 40; public use doctrine, 41; redevelopment projects and minority groups, 42; tax exemption conditioned on non-discrimination, 43; the private restrictive covenant as device to exclude minorities, 44; planning difficulties in a shortage crisis, 45.
- LEGISLATIVE PROPOSALS**
 need for legislative action, 173; recognition of cost dilemma, 174; industry's views, 174 ff.; "Washington Side Show," 175; antecedents of newer proposals in Congress, 175 ff.; Wagner-Ellender-Taft Bill, 177 ff.; objectives of the bill, 178; analysis of the bill, 178 ff.; private financing aids, 178; aid to private enterprise, 178; "yield insurance plan," 179; acquiring land in slums and blighted areas, 179; local aid for low-rent public housing, 179; rural housing, 179; inventory and disposition of government housing property, 180; criticisms of bill, 180; redevelopment provisions, 181; views on our economic system in relation to housing, 182-183; the bill as a middle-of-the-road approach, 183-184; some lacks in the bill, 185.
- PRIVATE PROPERTY—CHANGING ATTITUDES**
 fixity of legal tradition through two revolutions, 25; break-up of feudalism and impulse to individualism in property, 25-26; role of government—social ends of property, 26; policy making through purse-string control, 27; new ownership from changed risk-bearing, 29; rights as attributes of risk—implications for the future, 29.
- REAL PROPERTY LAW** (see **LAND LAW IN MASS HOUSING NEEDS**)
- RESTRICTIVE BUILDING PRACTICES** (see "HANDICRAFT AND HANDCUFFS"; also **CONTRACTOR LICENSING**)
- SHORTAGE IN HOUSING**
 problem of measurement, 3; population factor, 4-8; the "family" factor, 4; comparative population growth and family growth, 5; family formation, 5; the birth rate, 7; housing factor, 8-11; the dwelling unit, 8; additions to dwelling units, 9; quality of dwelling units, 9; relation of housing to population, 11-15; variables in gauging needs, 11 ff.; variables in gauging supply of dwellings, 11 ff.; table of shortages, on alternative assumptions, 13; prospects for period to 1960.
- SUB-STANDARD HOUSING** (see also **ADMINISTRATIVE SAFEGUARDS**)
 criteria, 10; legal safeguards on administrative action in elimination, 111.
- SUPPLY AND DEMAND** (see **SHORTAGE IN HOUSING**, and **ECONOMIC ANALYSIS**)
- TECHNOLOGICAL POTENTIALS** (see also "HANDICRAFT AND HANDCUFFS")
 psychological revolution prerequisite to mass production, 16; such fundamentals as molecular structure in scientific approach, 17; pitfalls in performance requirement approach in suggested building codes, 17; "overdesign" in codes—the "factor of ignorance," 18; minimal space standards re-examined, 18; new insulating materials for curtain walls, 19-20; surface material, 20-22; floors, roofs and partitions, 22-23; appearance—and the dead-weight of aesthetic conservatism, 24; need for research, 24; technological improvements, 74.
- VETERANS EMERGENCY HOUSING PROGRAM**
 background of the program, 143-145; objectives and characteristics, 145 ff.; magnitude, 146; major elements, 147; agencies involved, 148; progress, 150; obstacles to meeting goals, 150; Civilian Production Administration Order VH P-1, 151; governmental limitations on constructions, 151 ff.; price and wage controls, 154 ff.; effects of price decontrol, 155; remaining controls, 157; increased output of building materials, 158 ff.; price increase inducements, 159; priority assistance, 160; production orders and directives, 161 ff.; informal production orders, 163; labor recruitment assistance, 164; premium payments, 164; misc. inducements, 166; materials channelling, 167; industrialized housing efforts, 169; emphasis on rental houses, 170; major policy problems, 171 ff.
- WAGNER-ELLENDER-TAFT BILL** (see **LEGISLATIVE PROPOSALS**)
